All:

Myself, Carl and Tim met with WYDEQ this morning to gather more information about their drill rig engine permits that have been issued in the UGRB ozone nonattainment area.

Ex. 5 - Deliberative Process

## Ex. 5 - Deliberative Process

### Ex. 5 - Deliberative Process

#### Ex. 5 - Deliberative Process

In addition, the general conformity exemption regs. state that the exemption is only available for **stationary** sources. WYDEQ's drill rig permits do not consider drill rigs as stationary.

Without going any further into the weeds here, in talking with WYDEQ on the call today, their position is that their drill rig permits are suitable for an exemption from general conformity.

## Ex. 5 - Deliberative Process

# Ex. 5 - Deliberative Process

Typically, **stationary sources** that are permitted by the State in the Upper Green River Basin (UGRB) ozone nonattainment area, are permitted under WAQSR Chapter 6 and the State's 2008 Interim Policy for sources in the UGRB. In order to meet the requirements of WAQSR Chapter 6 and the 2008 Interim Policy, the permit requestor typically elects to fully offset the emissions from the stationary source.
